

CTV EQUIPMENT NEWS

POSTED January 28, 2020

Did you know CTV has a Camera Crane with Motorized Head? It has 360 degree rotation, an invertible camera platform for under or over slung camera positions with fixed-angle and automatic tilt control. (You'll want to add a focus control and video monitor.)

We also have a CamDolly Cinema System can mount any camera and all the shabang you need... and you can even ride along if you want to. Universal Tripod Holders can take whatever tripod you have. Full Kit includes 50ft (15.24m) of SnakeTrack for extra-long runs with the longest flexible solid rubber track. (You'll need a tripod and camera.)

Virtual Reality? Sure - Putting on the VIVE headset washes away the real world with fantastical experiences—from rec room-type games like ping-pong or pool to experiences spanning categories. SteamVR™ Tracking, stunning graphics, a 110° field of view, intuitive controls and HD haptic feedback provide an unparalleled sense of immersion. Includes high-end Xidax gaming computer with NVidia 1080 graphics card. Everything you need to have a VR party! (We recommend also renting 2 small tripods to hold the base stations.)

Got a field shoot that needs to be perfect? Lighting and sound are the most important parts of a pro field shoot. Get perfect lighting with the Professional LED Field Light (2 Astra LED Bi-Color Panel) Kit! It has variable tungsten to daylight color temperature with negligible color shift, 0-100% dimming and a universal (100-240 VAC) adapter. You can also run on 13-24 VDC batteries with separate V-Mount battery plate. (Batteries not included, but we have those for rent, too!) And when it comes to sound, you can't beat the Sound Devices 302 ENG/EFP Deluxe Field Mixer Kit - it's designed to provide field audio engineers with a complete field mixer system that delivers exceptional performance and comfort.

The 302 mixer features 3 line / microphone switchable input channels and stereo outputs in a rugged, light weight chassis.
